## Report

### VISIT REPORT 2021/2022

### S.Y.B.Sc. BOTANY

As per the requirement of our syllabus, ACS College Manur Second Year B.Sc. Botany students are visited of **plant tissue culture laboratory, Abhona**. On **13<sup>th</sup> may 2022** our botany department teacher Prof S. B. Sable and prof. V. K. Borase. went to the Field Visit of **plant tissue culture laboratory** called “**Namo Bioplants**” located at the Abhona in adjacent to the Girana river. The managing director of “**Namo bioplant**” laboratory is **parshwa sabadra**. The person has studied in **California, America**. as a master advanced degree of business laboratory management. The society has been managing Namu bioplants, since 2017, with an aim to nature and consume the process of production of plants and grow mainly more Banana plants. in this laboratory mainly banana tissue culture is done. It's one of the reaching laboratories. It is the huge laboratory of tissue culture Namu bioplants. is in term of area is spread over approximately in 15 acres. All the information given about Namu bioplants is their management secretary this is all about visit to Namu bioplants tissue culture laboratory. So we can conclude that the Namu bioplant is a multipurpose tissue culture laboratory as technically and also commercially used.

The Field Visit Was Planned IQAC and Department of Botany Under the Guidance of Principal Dr R.P. Bhamre.

## Report

### Field visit report -2021-2022

#### T.Y.B.Sc. Chemistry Department

#### BALAJI MASALE

We visited the Balaji Masale project for a field visit from the Kolhapur Phata Tal. Kalwan to get more information about Masale from the department of chemistry to the students and also to make the students aware of the importance of organic Masale for health.

At 2:00 pm to 2:30 pm is the duration of our visit. The businessman of Balaji Masale gives us information on how to make Masale. Magnesium carbonate is added to increase the shelf life of the product. Magnesium carbonate is used in Pan Masala preparation due to its soothing action to make powder.

It generally contains clove, cardamom and cinnamon, nutmeg, black pepper, coriander, cumin, star anise, mace and bay leaf. All of them are used in the correct proportion to balance out the flavor.

The Field Visit Was Planned by IQAC and Department of Chemistry Under The Guidance Of Principal Dr. R.P. Bhamare.

## Report Field visit report -2021-2022

### T.Y.B.Sc. Chemistry Department

#### WALSON INDUSTRY

We visited the Walson industry project for a field visit from the Kolhapur Phata Tal. Kalwan to get more information about sanitary napkins from the department of chemistry to the students and also to make the students aware of the importance of sanitary napkins for a health.

At 2:30 pm to 3:50 pm is the duration of our visit. The business man of the Walson Industry Mr. Bage sir gives us information of how to make sanitary napkins. Sanitary pads or napkins are useful for women because they protect from bacterial infections.

The formed wood pulp cores on the core forming machine are then wrapped by a nonwoven fabric and is sealed by a sensitive impulse sealing method. Nichrome alloy filament is used in the construction of the sealing pads. Finally, the position sticker is pasted on the napkin and the napkins are packed.

The Field Visit Was Planned by the IQAC and Department of Chemistry, Under the Guidance of Principal Dr R.P. Bhamare

## Report

### Visit report – 2021/2022

**T.Y.B.Sc. Botany**

**Date- 23 May 2022**

We visited the earthworm fertilizer production project for a field visit from the Karmveer Bhausaheb Hire Krishitantra Mahavidyalaya Manur, Tal. Kalwan to get more information about organic farming from the department of botany to the students and also to make the students aware of the importance of organic farming for a health and wholesome life vermicomposting is the product of the decomposition process using various species of worms.

At 1:00 am to 3:00 pm is the duration of our visit. The teacher of agriculture college Mr. Sonje sir gives us information of how to prepare a vermicomposting their importance used etc. the Vermicomposting is will be ready in 60 to 90 days period. This vermicomposting is useful for farmers because this is a to organic way to forming.

Vermicomposting contains water-soluble nutrients and is an excellent, nutrient rich organic fertilizer & soil conditioner. It is used in gardening & sustainable organic farming.
